

MAPAL RANGE

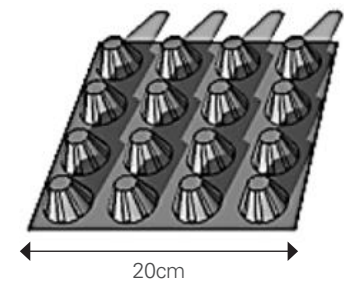

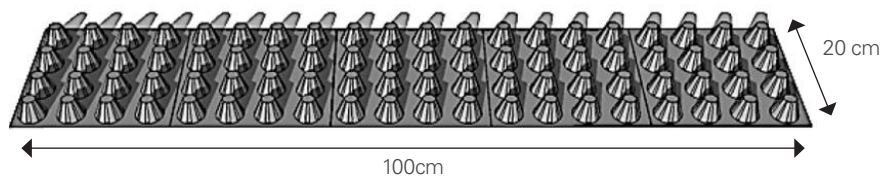

DRAIN SPACER - The Simple & Effective Barrier Between Root & Ground

APPLICATIONS

- Gro Bags
- Pots

SPECIFICATIONS

- UV Protected Polythene
- 700 Micron material thickness
- 5-year material warranty
- Standard measurements: 100cm x 20cm (to suit std. grow bags)
20cm x 20cm (to suit up to 10cm pots)
- Other widths available to order*: 30cm, 40cm & 60cm

FEATURES & BENEFITS

- UV Resistant.
- Easy to store and reuse.
- Resistant to chemicals, acids and steam sterilisation.
- Creates approx. 3cm air space/gap underneath containers & pots, allowing roots to be air pruned.
- Prevents plastic of bags sticking to Polythene or Mypex mulch in raised protected bed applications.
- Aids in better drainage of bag or pot.
- Prevents root intrusion into soil, creating physical barrier between product containing substrate and soil, aiding in prevention of disease transfer (i.e. Phytophthora, Red Core, Wilt, etc).
- Improved irrigation/fertigation control.
- Improved plant health and fruit quality.
- Can be used in combination with trough/bag type applications for better drainage control, run off collection.
